

GLOBAL WARMING SUMMIT

Dr. David Carlson

*Director,
International
Programme Office,
International
Polar Year*

Keynote Address:

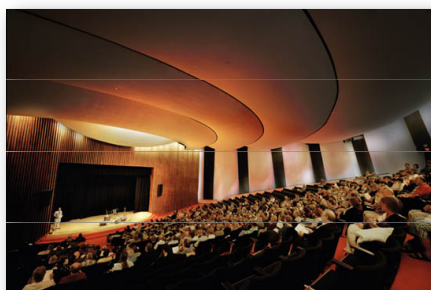

***Exploring the Polar
Regions at a Critical
Time***

***“IT’S NOT TOO LATE—BUT THE WORLD
HAS AT MOST 10 YEARS TO ALTER THE
DANGEROUS TRENDS OF GLOBAL
WARMING.”***

Jim Hansen, NASA
YaleGlobal, 24 October 2006

**An evening presentation for
students and the general public.
Free Admission**

Dr. David Carlson is one of the world's leading experts on the global warming and the current state of the planet. Dr. Carlson will be bringing the latest data from around the world to share with students and the general public.

Thursday, Feb. 28, 2008

Schedule:

7:00-8:00 P.M.

Keynote: A Critical Time

8:00-8:30 P.M.

Panel Discussion

If you are concerned about the future of the planet, don't miss this opportunity to find out what the data really are telling scientists about the rate of climate change.

- ☼ What effects will you most likely see in your lifetime?
- ☼ What can you do to make a difference?
- ☼ What needs to happen in the next eight years?
